

A1LIFT CRANE HIRE 2023

COMPLIANCE EVALUATION POLICY

POLICY STATEMENT

As part of our commitment to achieving the principles of health and safety in our workplace, A1 Lift Crane Hire recognise our moral and legal responsibility to provide a safe and healthy work environment for workers, contractors, customers and visitors. This commitment also extends to ensuring that our operations and activities are carried out in compliance with relevant health and safety laws, regulations, codes of practice and standards.

AIMS AND OBJECTIVES

We will ensure that audits of the company's health and safety activities (including policies, procedures, and other documentation) are carried out regularly, and reviewed at least annually. These audits will be designed to identify non-conformances with statutory duties under an Act, and to assess not only the degree of compliance with those duties, but those areas where improvements are necessary to ensure compliance.

RESPONSIBILITIES

Management of the company (including officers) will be responsible for ensuring compliance with health and safety duties. This will include assessments of workplaces and systems of work, and ensuring that all workers (including supervisory personnel) are aware of and are fulfilling their duties. Officers must ensure that information regarding health and safety is up to date and accurate, and ensure compliance in the workplace with relevant sections of the Act and Regulations.

Workers and employees (including volunteers) must take reasonable care for their own health and safety and for the health and safety of other persons, and comply with any reasonable instruction or policy given by the company to enable it to comply with relevant health and safety legislation. Workers and employees should follow all precautions specified in work procedures and instructions, and not deviate from or alter standard work procedures unless authorised by company management following a risk assessment of the changed procedures.

Personnel selected to carry out compliance evaluation will have the skills and knowledge necessary to evaluate the company's systems and activities, and be required to prepare and submit a report detailing deficiencies and non-conformances, and recommendations on how these can be rectified. Where necessary, a third party may be engaged to carry out the compliance evaluation to ensure an impartial appraisal of compliance.

Officers of the company will ensure that these recommendations are implemented, and monitor the workplace to ensure that the implemented controls achieve an acceptable level of compliance with health and safety duties imposed under the relevant Act.
